RE. Comments - Draft Phase I RFI/RI Report Operable Unit No. 15 Inside Buildin Closures, August 1994

Dear Mr Slaten,

The Colorado Department of Public Health and Environment, Hazardous Materials an Waste Management Division (the Division), has reviewed the above referenced documen submitted by DOE and prime operating contractor, EG&G The Division's comments ar attached Comments from the EPA will be forewarded under seperate cover on receip by the Division

The Division finds the overall quality of this draft report to be very high. The Division commends the DOE and EG&G staff for their thorough, professional, and cooperative approach to the implemention of this investigation. The attached comments are largely editorial clarifications and should not require major revision to the Final Phase I RFI/RI Report.

The Division recognizes that the buildings containing these IHSSs are currently being considered for economic redevelopment by the DOE under the National Conversion Pilot Project (NCPP) To that extent, the Division urges the DOE to integrate building clean-up activities under the NCPP and any future actions associated with COULS in as efficient a manner as possible

If you have any questions regarding these matters, please call Jeff Swanson of the staff at 692-3416

Sincerely,

Ja Duitel Joe Schieffelin
